## THORNLESS REDRASPBERRY

Truly an improved thornless Latham—the berries are the same shape, size and color of Latham, but ripens two to three weeks earlier, and is ENTIRELY THORNLESS. See photo, at left. Starts to ripen about the 20th of June here in Michigan, and picks over a long period. If you cannot get over your entire patch in one picking, you will not have any loss, as berries can be left hanging on the vines two or three days after they are ripe, which cannot be done with Latham or any other Red Raspberry. It is a thrifty grower—will grow on most any kind of soil; disease-resistant. Comes on the market when there are no other red raspberries being offered, which means one to two dollars more a crate. An excellent companion for the famous Latham, giving you a picking season of about 6 weeks in all. Remember, no more thorns to scratch your hands when picking red raspberries!

Due to the small supply of plants this year, are limiting all orders to 250 plants to any one customer.

PRICE: 1-Yr. plants, 6 for \$1.75; 12 for \$3.15; 25 for \$5.25; 50 for \$9.50; 100 for \$18.00; 250 for \$40.00. Net, no discount.

## SUPERFECTION EVERBEARING STRAWBERRY

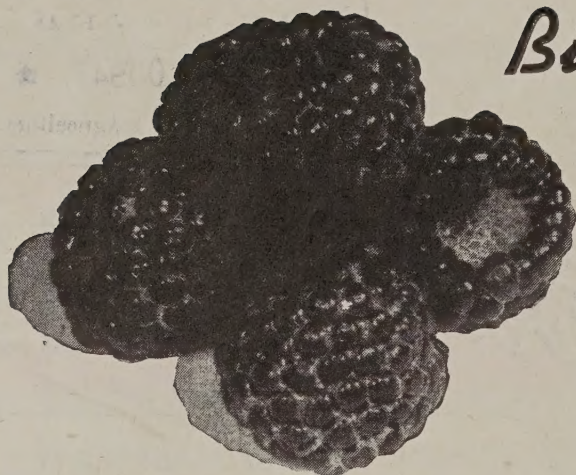

This new Everbearer was originated and named by Mr. Keplinger, of northern Michigan, the man who discovered the famous Gem everbearer. Berries are large, roundish in shape; are dark red all the way through, with a very fine sweet flavor. Berries are of firm texture, will withstand long-distant shipping without discoloration or softening of berries, which is quite common with most all everbearers. Ripe berries 90 days after planting; heavy yielder—produces an abundance of large berries until snow flies, plus another bumper crop the following year. An excellent plant maker on most any soil. We have lots of faith in this new variety, and it deserves a trial. Our planting stock secured direct from originator.

PRICE: 25 for \$2.75; 50 for \$5.00; 100 for \$9.00; 250 for \$20.00. 500 for \$40.00.

being a more thrifty grower, and also ripens 10 days to 2 weeks earlier than Cumberland.

Berries are large, jet black in color, very firm and have a delicious sweet flavor. Strong thrifty grower, and very resistant to disease. The berries retain their large size throughout the picking season—the last picking as good as the first.

The fine characteristic of this new berry plus all the good qualities of the Cumberland, combined with its early ripening season, make this the best early berry. Plant both the old and New Improved Cumberland and lengthen the picking season 2 weeks.

We are using this new blackcap as a premium so our customers can see what a wonderful berry this is. NOTE OFFER BELOW.

PRICE: 5 for \$1.25; 10 for \$2.00; 25 for \$4.50; 50 for \$8.00; 100 for \$14.00.

This New Variety Was Offered For The First Time 2 Years Ago. Ripens 2 weeks earlier than the "Old Favorite Cumberland." Everybody has been looking for a blackcap that is better than the Cumberland. We have now found one that has all the good points of the Cumberland plus

## We Aim to Tell You the Truth—We Are Farmers, Too. and Don't Try to Sell You Any Varieties We Ourselves Would Not Plant

### No Cash Payment Before Shipment

You examine stock before you pay. This offer applies only on orders amounting to \$3.00 or more, for shipments on or before April 25th, 1947.

We are one of the first nurseries in this section of the country to adopt this unique selling plan, whereby it is possible for customers to order without sending any money. Make out your order at full prices listed in catalog, and instruct us to ship C.O.D., express or parcel post, subject to your examination by express only, as the postal authorities do not permit examination of parcel post shipments.

Look over the shipment and see for yourself whether the stock is in good condition. If shipment is satisfactory, pay your express agent the amount due and the plants are yours—still covered by our guarantee. What could be more fair? We simply must furnish good nursery stock or we couldn't possibly afford to make this offer.

We would advise all small shipments sent by mail, and will send your order by parcel post C.O.D. for purchase price, plus postage, if you prefer. All such shipments are fully covered by our guarantee.

NOTICE: The above offer does not apply on orders amounting to less than \$3.00; on Special Bargain Collections; Special Quoted Prices; nor on any orders specifying shipments later than April 25th, 1947. Cash in full must accompany orders under \$3.00, or those calling for shipment later than April 25th; but on such orders customers will be entitled to our cash discounts from regular catalog rates, as explained at the right.

WE GUARANTEE SAFE ARRIVAL OF ALL SHIPMENTS MADE ON OR BEFORE MAY 25th, 1947.

We reserve the right to cancel all printed prices without notice.

### Order Early and Make a Big Saving

10% DISCOUNT ON ALL CASH ORDERS

(Except on Bargain Offers and Special Quotations) Received before February 1, 1947.

To those who wish to send all cash with order, we offer these special cash discounts from our regular printed prices (except on Bargain Offers and special quotations).

### Pay Cash and Save Additional Cost on C.O.D. Shipments

Some concerns add 5 per cent to their list price, in addition to the required C.O.D. fees, if order is for C.O.D. shipment. Knowing our stock will be satisfactory, we will ship C.O.D., if your prefer, at our regular printed price, although we want to remind you of the collection and money order fees on C.O.D. shipments. These charges, over which we have no control, or do not receive one cent of the fees, amount to approximately 5 per cent on average orders. You can save this 5 per cent on average cash with order. You take no chances—all shipments are backed by our guarantee.

The ACKERMAN NURSERIES

**BILL ACKERMAN**

*We Grow because we give you Big Values*

**100,000 Satisfied Customers—In Every State in the Union Plant Our Hardy Stock—the Reasons are Simple**

So many customers cannot be wrong—they buy from us year, after year, for they know our stock can be depended upon. Here are some of the reasons.  
We sell only the best hardy Northern grown stock at lowest possible prices.  
We promise a fair and square deal to everyone—and make good our promise.  
We ship stock subject to examination before payment.

**WHY Can We Sell Such Fine Stock at Such Reasonable Prices?**

**BECAUSE--**

We sell direct from our catalog only—you have no agents' commission to pay.

We are not jobbers—we grow a tremendous amount of stock, which is handled only once—direct from the nursery to you.

We purchase no large advertising space—we depend largely upon our friends and customers to advertise our stock.

You will find that this is a book which is made especially for farmers, home owners, fruit growers and gardeners; giving them a chance to buy direct from a nursery at wholesale prices.

We wish to make clear that all stock in these bargains is the same high quality stock offered at regular catalog prices. By placing your order with us, you will be sure of receiving plants, trees, etc. that are first class and up to grade in every respect.

We have been growers for over fifty years, and have farms with the best of soil, tractors, trucks, packing houses, and

**NOTE:** New discounts on early orders. Also additional premiums. See page 2 for Free Premium.

**100,000 Satisfied CUSTOMERS Can not be Wrong**

everything necessary to grow and pack nursery stock, making the handling charge much cheaper; all of these savings are passed on to our customers—we work on a very small margin of profit.

We also wish to sincerely thank all of our old customers for their continued patronage. As the bulk of our new business comes from unsolicited patrons recommended by our satisfied customers, this shows confidence in The Ackerman Nurseries, on which we base our hope of future business.

## 3 Generations of Ackermans Have Been Pleasing Their Customers for 56 Years

With this, our 56th Anniversary, it is again my pleasure to extend greetings to each one of you, and to thank our old friends and new customers for their continued patronage. We again pledge the same old-fashioned farmer-to-farmer square deal policies, which 56 years of steady progress has proven to be the only way to do business.

We felt certain by the time we made up our 1947 spring catalog, conditions would be back to normal and we would have plenty of all the various items we use in our business, but as is common knowledge to most everyone, have found everything is now scarcer and harder to get than it has been heretofore; labor conditions are worse, and it is impossible to buy farm machinery, and most all items we use are practically off the market. Surely a bad "mess." All of our costs have increased within the past season, but we are still going to give you a square deal on the price.

At this writing we are having the worst drought we have had in years, and undoubtedly there will be a big shortage in all small fruit plants, although fruit trees are a little more plentiful than they were last year—as it takes two or three years to propagate these trees, weather conditions this year do not affect them too much as they are already established. With the shortage of labor, shortage of material, and unfavorable weather conditions, we will still have a fair supply of stock. However, would advise placing your order early if you do not want to be disappointed.

Those who planted small fruit plants last year were surely in on the high prices as small fruits brought the highest prices in history. For instance, strawberries brought \$10.00 for a 16-quart crate for the top price and the Cannons took them at \$7.00; Red Raspberries brought \$7.00 for a 24-pint-case; Black Raspberries brought from \$5 to \$6, and Blueberries from \$5 to \$6 for a 16-pint-crate. We feel this condition will continue for the next several years; therefore, you cannot go wrong. It is a proven fact an acre of small fruit plants will bring in a larger cash return than forty acres of grain. Plant now and get in on the high returns.

After flying 90 missions, Lt. Bill returned from the service safe and sound last November, and started working in the office the first of January. This summer he has been devoting his full time on the farms becoming familiar with the propagation of all stock, so he will know the business from the ground up. With the three of us now on the job, you are assured of the same personal service always rendered by ACKERMAN in filling your order.

Now that labor has secured its increase in wages, the strikes should be about over; although conditions are still uncertain at this time, believe they will soon settle down to normal. Therefore, we still feel we can give you prompt service and have stock arrive as near the date specified as possible, for transportation facilities were very good last spring and believe we will have no more trouble as to unfavorable delays in getting shipments to you.

**PLACE YOUR ORDER EARLY!** We are offering special discounts for all cash orders placed early in the season for we can take care of this work much easier before our shipping season opens up. Our shipping season usually starts the last week in February and continues through March, April, May and June. However, dormant trees and shrubs can be shipped to Southern States earlier. If a specified date is given as to time of shipment, we will try and ship as near that time as possible; if not, will ship at proper planting time for your locality. We feel sure with your cooperation in placing your order early so it may be booked before our rush season is on, we will be able to accommodate all of our customers in a very satisfactory manner.

**KEEP ALL PAPERS.** All papers pertaining to your order will be returned to you when order is acknowledged. **DO NOT DESTROY THEM.** If necessary to write us at any time, be sure and return everything sent to you, except planting instructions, including correspondence, original order and tags.

To our new friends who are receiving our catalog for the first time, we want to assure you that your order will be filled with high quality stock and will make you glad you tried ACKERMANS.

## —OUR GUARANTEE—

We guarantee all of our nursery stock to be just as represented in our catalog; fully up to grade, of good quality, free from disease, and absolutely true to name; also to reach the customer alive, and in perfect growing condition.

Furthermore, we will, at our option, either replace free of charge, or refund purchase price on any stock that arrives in bad condition, providing claim is made within 10 days after arrival. If stock is unsatisfactory on arrival, be sure to get a signed statement from your express agent or postmaster showing extent of damage, and send this along with your claim. Do not return plants unless so instructed by us.

Continued growth depends upon soil, climatic conditions, planting and care—conditions we cannot control—hence is not guaranteed.

It is understood and agreed between the customer and ourselves that the purchaser's order and our acknowledgment of its receipt, shall constitute a mutual acceptance of the above terms and conditions.

Scarlet Leader

## SCARLET LEADER

*Midseason*

About eight years ago we found this variety growing wild along the ditch bank; observing the extremely nice berries on these plants, we started propagating from same. Extensive tests proved it to be a worthwhile variety; therefore, we have now built up a large enough stock, so we can offer this variety for sale. We believe it to be a seedling. Because of its deep red color all the way through we have named it Scarlet Leader. Shape and size of the berry is similar to that of the Premier; berries are firm and of a delicious sweet flavor. Is a midseason variety, ripening right after the earlier kinds. Hardy, and disease-resistant. An excellent plant maker, producing a matted row under the most unfavorable conditions. This year this variety produced over 500 crates per acre, selling on the Benton Harbor market for \$7 to \$10 per case.

Get started with this brand new variety for we are certain it will be a leader among the outstanding kinds offered—a variety that every fruit grower should have.

**PRICE:** 25 for \$1.25; 50 for \$1.95; 100 for \$3.00; 250 for \$7.00; 500 for \$12.00; 1,000 for \$20.00.

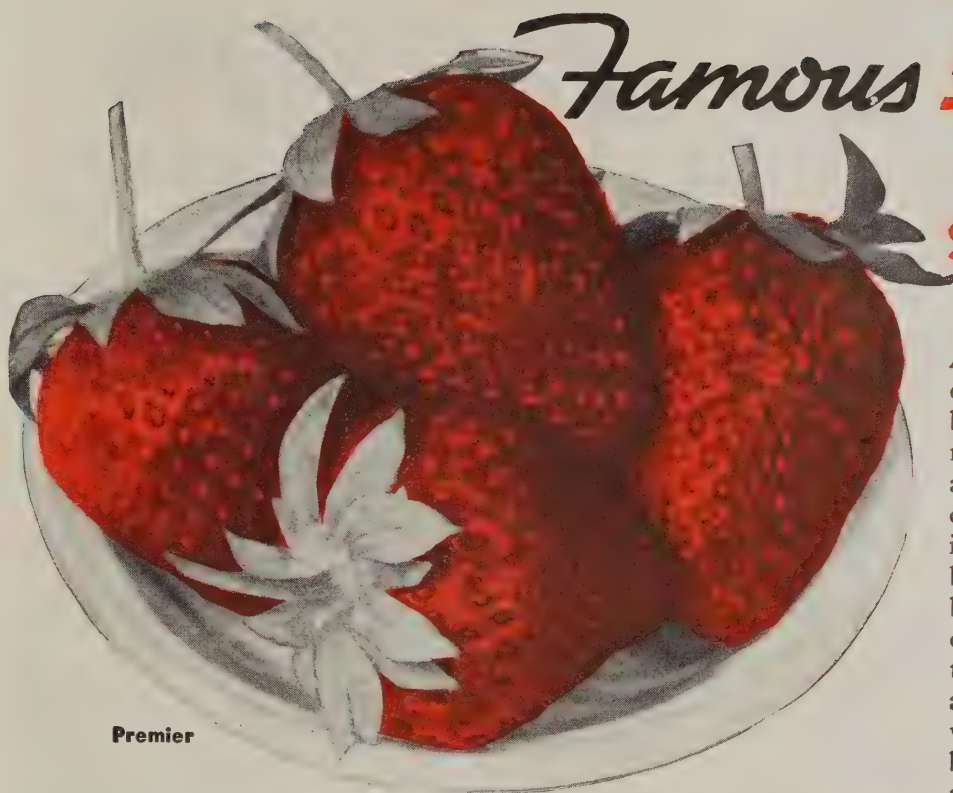

Late  
Giant

## LATE GIANT *Best Late*

Ripens so late that there will be no waiting between strawberries and raspberries. Berries are dark red all the way through, honey-sweet, with a flavor of a wild strawberry. Berries are giant in size and of good quality. Make a good fruiting row on any soil. This variety has proven to be exceptionally resistant to Red Stele.

**PRICE:** 25 for \$1.10; 50 for \$1.85; 100 for \$2.85; 250 for \$6.15; 500 for \$9.00; 1,000 for \$17.00.

Premier

# Famous **PREMIER** Best Early **STRAWBERRY**

**Still the leading early berry.**

A standard of excellence with all growers, and the earliest worthwhile Strawberry of the older varieties. A great money-maker, for it yields its fruit crop at a time when strawberries are in great demand and sell at fancy prices. Premier is as nearly frost-proof as any strawberry can be. It is unusually healthy, being free from leafspot and other diseases. Its deep heavy roots enable it to withstand dry weather and mature a full crop of big berries when many varieties are a complete failure. Large, bright red, firm berries of fine texture and flavor.

**PRICE:** 25 for 95¢; 50 for \$1.65; 100 for \$2.75; 250 for \$5.85; 500 for \$8.75; 1,000 for \$16.00; 2,000 for \$30.00.

# **ROBINSON** Best Late **STRAWBERRY**

This berry was originated by John Haley, of Southern Michigan. It is a cross between Premier and Washington. The best medium to late—10 days to 2 weeks later than Premier. In our 50 years of growing strawberries, Robinson is the largest berry we have ever seen—30 berries will fill a quart. This variety has been grown commercially for the past seven years in Michigan; has produced a wonderful crop of fruit every year under most unfavorable conditions—farmers netted over \$1,000.00 an acre from this variety this summer.

Berries are extremely large, and honey-sweet. Color is decidedly a cardinal-red, and this berry may be offered under this name. Berries have a firm, tough skin, making it an excellent shipper to distant markets.

Excellent plant maker on most any kind of soil.

Premier and Robinson, two of the best varieties, will give you berries over the entire season.

**PRICE:** 25 for 85¢; 50 for \$1.50; 100 for \$2.50; 250 for \$5.50; 500 for \$8.00; 1,000 for \$14.00; 2,000 for \$26.00.

**Here is what one customer says about Robinson!**

Mt. Carmel, Ill.

"I am in the market for 8 Montmammoth and 2 Black Tartarian but am undecided as to the time of planting; which would you advise fall or spring?"

Wish to state your Robinson strawberry has attracted considerable comment—16 berries filled a quart box so that another could not sit on it without leaning."

As the supply of planting stock is still very small, are again limiting each customer to twelve plants.

## SOUR CHERRIES

### New Montmammoth Sour Cherry

A comparatively new sour Cherry. Found by Lee McClain, of Knox County, in 1928. High quality cherries are large—often caliper an inch in diameter. As the tree is dwarf and spreading in growth, is much easier to pick than other varieties as the bulk of the crop can be harvested from the ground. Heavy producer—3 to 5 fruits per spur; the parent tree was one-year-old when planted, which was 30 years ago, and it produced a 6-gallon-crate of fruit the third year. We are so favorably impressed with this Cherry, we do not hesitate to recommend it to any one, whether for home use or for commercial purposes. The many fine points that this sour Cherry has, we believe, will eventually take the place of all other sour Cherries when stock is available. **We offer a one-year-old tree, as follows: Price: 2-3 ft. trees, \$1.50 each; 3 for \$4.35; 10 for \$14.00.**

# NEW Tested VARIETIES ACKERMAN'S Northern Grown

There's a Difference. Northern Grown. Buds Especially Selected from Heavy Bearing Trees; Insures a Bumper Crop.

We wish to call special attention to the new varieties listed on this page, which have been tried and tested, and are outstanding either for home use or a commercial proposition. You cannot afford to overlook these new kinds—they are sure money-makers.

**RED ELBERTA.** U.S. Plant Patent No. 232. This rich red-all-over Peach is identical with Elberta in tree and fruit with a much improved flavor, but ripens 10 days earlier. The flavor is exquisitely rich, sweet, and free from all bitterness. It is fine textured, firm and able to hold up for long-distance shipping and canning requirements. The rich red color sells the fruit on sight and demands as high as 75¢ more per bushel than other Peaches. Discovered in 1928—10 years of fruiting and testing has proven this to be a favorite among the early varieties. **Price: See page 21.**

**AMBER GEM.** This grand new variety is a semi-cling; shaped like an Elberta and ripens same time. Beautiful yellow flesh with deep red blush; delicious honey-sweet flavor. Will hang on the tree from ten days to two weeks after it ripens. Truly one of the largest peaches we have ever seen. One of the best canning varieties known at the present time—used extensively by all canning factories. It is extremely hardy and very productive. Excellent variety for long distance shipping, as it will keep several days after being picked. **See page 21 for price.**

Red Elberta

Amber Gem

**FERTILE HALE.** This variety will produce full crops of beautiful large peaches, entirely free from all so-called "buttons" so prevalent in crops of J. H. Hale, for it is self-fertile. Season little later than Elberta. Fruit very large; flesh yellow, with deep carmine blush. Very hardy freestone. Splendid market variety. **Protected under U. S. Plant Patent.**

**PRICE:** 1-yr., 7/16 in., \$1.00 each; 10 for \$9.00; 100 for \$80.00. 1-yr., 9/16 in., \$1.25 each; 10 for \$11.00; 100 for \$90.00.

Especially valuable for hedges and borders in cold, exposed locations. When planting, cut back to 4 inches above ground to make hedge bushy at bottom. **Price:** 2-year, 12-15 inch, 6 for 90¢; 12 for \$1.35; 25 for \$2.50; 50 for \$4.50; 100 for \$8.00. 2-year, 18-24 inch, 6 for \$1.50; 12 for \$2.25; 25 for \$3.95; 50 for \$7.00; 100 for \$12.00.

Besides their value in destroying insects, many species help in keeping down weeds. Offer the birds board and lodging by planting berry producing shrubs, and you will have a host of willing helpers, working tirelessly for you throughout the whole year.

Insect-eating birds flock to farms where a side dish of brilliant shrub and tree berries has been planted.

**New  
MONTMAMMOTH  
CHERRY**

This variety was found by Lee McClain, of Knox County, in 1928. A sport of the Montmorency. Bears the second year—no waiting for fruit. High quality cherries are large—often caliper-ing an inch in diameter. As the tree is dwarf and spreading in growth, it much easier to pick than other varieties as the bulk of the crop can be harvested from the ground. Heavy producer—3 to 5 fruits per spur; the parent tree was one-year-old when planted, which was 30 years ago, and it produced a 6-gallon-crate of fruit the third year. The many fine points that this sour Cherry has, we believe, will eventually take the place of all other sour Cherries when stock is available.

**We offer one-year-old, 2-3 ft. trees, \$1.50 each; 3 for \$4.35; 10 for \$14.00.**

The earliest peach for northern growers. This tree was found 7 years ago in an orchard of one of our prominent commercial growers in Berrien County. We have been watching this tree year in and year out, and it has never missed a crop in the past 7 years. We secured our budwood from this parent tree, and have now propagated enough trees so we can offer them in limited quantities. We are quite impressed with this new Peach as it comes into bearing in July.

The Peach is practically round; almost completely covered with a beautiful, bright-red coloring; flesh is yellow, firm and juicy—one of the sweetest and juiciest with a wonderful peach flavor. This peach, over a period of 7 years, has been a freestone four years and a semi-cling three years; we believe weather conditions govern these characteristics.

In planting these trees you will be assured of early profits or money in your pocket long before standard varieties begin to produce. Try a few trees and you will have peaches and cream long before other varieties start to ripen. Extremely hardy here in Michigan, and a sure-cropper.

1-Yr., 3-4 ft. trees, \$1.50 each; 3 for \$4.35; 10 for \$14.00  
1-Yr., 4-5 ft. trees, \$1.75 each; 3 for \$5.10; 10 for \$16.50.
